Many of the standard social science methodology texts do not cover the literature review as a method in itself, yet it is a compulsory part of doing research. Although it is fairly straightforward to teach social science research methodology, the process of research and techniques for quantitative and qualitative design, the part of research most students find difficult is writing a critical review of existing knowledge - the literature review. An Introduction to Traditional and Systematic Literature Reviews is an accessible and practical introduction for students on how to conduct both 'traditional' and systematic literature reviews and incorporate them into their research. This book is ideal for any health, business or social science student looking to embark upon their own project.

Elsewhere in this section, a number of books are listed which cover the literature review. These range from a practical introduction to evidence-based practice and comparative effectiveness research, to more advanced works on evidence-based healthcare and public health, and the thinking and learning skills needed to carry out research.
Evidence-Based Clinical Practice in Nursing and Health Care Assimilating Research, Experience and Expertise, Alan Pearson, John Field, Zoe Jordan, Jan 16, 2007, Medical, 208 pages. Evidence-Based Clinical Practice in Nursing and Healthcare examines the Joanna Briggs Institute model for evidence-based practice which recognises research, theory and practice.
